Notes

- All figures are compiled following a transition to the [INDIGO](#) database system. Please read our new [Dictionary of Data Definitions](#), have a look at the open-source code on our [GitHub site](#) and/or leave us feedback [here](#).
- **Service users:** The number of service users is a combination of two values. Completed projects have data on the actual number of service users and ongoing projects have data on target number of service users. If we have data on actual numbers, we will use them. If the project only has data for targets, we will use target numbers. This calculation is based on the variables "Service and beneficiaries - Targeted number of unique service users or beneficiaries" and "Service and beneficiaries - Actual number of unique service users or beneficiaries". In future we propose to report on these figures separately.
- **Capital Raised:** The final figure of Capital Raised is based on the variables "Total Investment Commitment - Exact Amount in USD" (for the global landscape) and "Total Investment Commitment - Exact Amount in relevant currency" (for the UK landscape). This figure is calculated using only data that are publicly available.
